

# dormakaba for Healthcare

Whether hospitals, retirement and nursing homes, homes for dementia patients, psychiatric facilities, medical centres, doctors' practices and pharmacies- all these different types of facilities need to satisfy a host of complex requirements and legal provisions.

The optimization of operational processes plays an important role in saving time and planning resources. For all these facilities and your individual areas we offer a wide range of access solutions and services.

Our modern hardware and software solutions let you organise and secure operations in your facility – simply, reliably and on demand.

They control your people flow, grant various access rights for different groups of people and individuals and enable unhindered access for people with mobility limitations.

We support you in planning access concepts that are tailored to your individual needs.
